NOTICE FOR LOGIQIDS MENTAL APTITUDE PROGRAM 2024-25

DBSSSN/R/ACAD/SR.KG-IX/OCT/24/22
8th October 2024

Dear parents,
Given below is a brief summary of the **Free of Cost-Mental Aptitude Programme 2024-25** that is conducted by LogiQids.

PROGRAM OVERVIEW

This program focuses on building crucial 21st-century skills like logical reasoning, problem solving, and analytical thinking in students of Sr. KG to Class 9 by exposing them to **puzzles and brain teasers.** The idea is to present these students with **non-academic** brain-teasing questions that make them think and help them develop a structured approach to problem solving and logical reasoning.

The program can be broken down into 3 stages:

1) **Practice (Free of Cost):**
   - Up to 30 digital worksheets and unlimited brain training games
   - Access to an online mentor, who helps clarify any doubt the child may have
   - Self-paced "do-at-home" exercises that take up not more than 15 minutes a week

2) **First Stage Logical Reasoning Olympiad (Free of Cost) :**
   - **Offline** pencil & paper based MCQ test to be conducted in the school
   - Tentative Date: **November 2024**
   - Detailed report for the school and the students
   - Participation certificates for all students

3) **Final Stage Logical Reasoning Olympiad (Optional & Chargeable):**
   - Only the top scorers from the first stage are eligible to register
   - Just like the first stage Olympiad, this stage is also conducted in the school
   - Tentative Date: Feb - Apr 2025

   Final Registration is optional and up to the parents to decide; it is to be done directly on the website and no cash collection is involved at school level.

IMPLEMENTATION DETAILS

The practice worksheets are done by the students at home and LogIQids team is available to address any queries which the child may have on any question.

1. LogIQids team create accounts for the students and assign them worksheets.
2. The team also send detailed hardcopy circulars for all the students explaining the program along with the process to access the worksheets
3. They also provide a customer care number for parents to reach out to them in case they have any queries.
4. Students can login and start practicing on the mobile app or website (Both mobile app and website are ad-free and child safe)

REPORT AND ANALYSIS SHARED

After the first stage results, LogIQids team will share a detailed report with the school on the performance of the students. This report analyses the performance of students on various parameters like analytical thinking, logical deduction, numerical ability, etc and it provides a detailed in-depth view for each grade and division along with a comparison with global averages.
Final stage registration will be notified.
